Drum Cleaning Simplified

DRUM BLASTER

When attached to a compatible high pressure washer, the AaquaTools DrumBlaster is designed to clean the interior surface of closed head 55 gallon drums, where the insertion opening is smaller than two inches. It cleans these types of drums in 1 to 5 minutes depending on detergent, water volume (gpm) and wash water temperature.

The cleaning efficiency of the DrumBlaster is achieved thanks to four stream jets that operate at a low flow rate, but high pressure, providing a high impact wash cycle. The stream nozzles rotate around a turret to provide complete orbital cleaning coverage of the interior surfaces of the drum.

Drums to be cleaned are pivoted onto our stainless steel platform. A valve included with the system is opened and the wash cycle begins. The system works best with 4-6 gpm, hot water (160-185°) and AaquaTools "650" detergent.

- Two powerful cleaning nozzles configurable to four stream nozzles
- Large stable platform
- "Y" screen filter and bleed off valve
- Oversized case and gears
- High pressure "T" valve

Specifications

Water Pressure	870-2000 psi
Flow Rate	4-5.5 gpm
Class	Rotating jet-head
Power	Pressure washer-driven
Water Temp	185°F (max)
Nozzles	Two ½" nozzles; configurable to four stream nozzles
Nozzle Rotation	120 rpm (max)
Spray Coverage	6-10'
Inlet Connection	Standard ½" NPT
Seals	Viton and PTFE
Pre-filter/Mesh	700 Micron stainless steel
Material	Stainless steel & anodized anticorrosive aluminum
Weight	50 lbs
Hose	3/8" 25' steel braided high pressure hose
Service	300-400 hours
Warranty	One year limited warranty

Ordering Information

CRTBLSTR2	DrumBlaster Cleaning System; stainless steel frame, 25' high pressure hose, two nozzle cleaning head, all fittings to adapt to pressure washer
650 CartClean-55	55 gallon drum "650" heavy-duty CartClean detergent; extends system warranty to 24 months
650 CartClean-5	5 gallon pail "650" heavy-duty CartClean detergent; extends system warranty to 24 months

The oversized case and gears provide a significant advantage over the competition, smoother motion and withstands greater pressure. The gears are made from a revolutionary self lubricating hard plastic that is more durable than brass.

The spray pattern completely covers the inside of the container. Its large stable platform and low profile nozzle facilitate easy loading and removal of a wide variety of containers.

Compatible Hot High Pressure Washers

The **HotCart** was developed by AaquaTools to replace traditional hot high pressure washers that rely upon water heated thru a coil that in turn makes the wash water contaminated with particulates in the wash fluid.

The **KEW Poseidon 7-67** premium class industrial hot (up to 185°F) & cold water pressure washer combines the renowned lifetime quality of the "C3" pump, with state-of-the-art ergonomics to bring you an unbeatable heavy-duty pressure washer solution to fill the needs of a variety of industrial applications. The high water flow makes it very useful for applications where a high level of dirt has to be removed or flushed away quickly and easily.
