Compact Tankless Hot Water Generator/High Pressure Washer

THE CUBE

Indoors, outdoors you name it—hot water anywhere! Just provide the water and we'll heat it up to 185°F with flows up to 13 gallons per minute. With our pressure washer option, you can enjoy hot water and high pressure up to 2750 psi with flows up to 5.5 gpm.

The Cube was developed by AaquaTools to replace traditional hot high pressure washers that rely upon water heated through a coil that in turn makes the wash water non-potable and leaving particulates in the wash fluid. Because the Cube uses onboard tankless water heaters to generate hot water, the finished product is exactly the same as the source water, only heated. The Cube's digital touch pad allows the operator to set a precise temperature, +/- only 1 or 2 degrees. The tankless water heaters are fired by clean burning, high quality propane or natural gas, providing more efficiency, increased reliability and makes it extremely user-friendly. No smelly diesel fumes or burner issues related to diesel, kerosene or less than high quality fuel.

- Two on-demand gas water heaters
- High pressure pump
- Low emissions
- Digital control touch pad
- Quick-Connect compatible
- Unit can be wall-mounted or stationary

Specifications

Power	220V-440V (switchable), 30 Amps
Pump	KEW high pressure, 8.8 hp
Tankless Flow Rate	13 gpm at approx. 110°F
Max Temperature	185°F at approx. 6 gpm
Pressure Washer	2750 psi at 5.5 gpm
Water Heater	Energy efficient tankless water heater
Heat Source	High quality propane or natural gas
Installation	Wall Mounted or Stationary
Frame	Stainless Steel
Weight	358 lbs
Warranty	One year limited warranty

Ordering Information

The Cube	Cube, KEW high pressure, 8.8 hp pump
LotWasher	Lot Washer 1122 11 hp Honda, 2200 psi, 4.0 gpm
107146814	KEW Poseidon 7-67 cold & hot water pressure washer

Special Features

Constant Temperature Control.

The Digital temperature control system allows for precise control of the water temperature.

Energy Efficient.

Using advanced technology allows for 80-85% efficiency in our product. AaquaTools tankless gas water heaters provide an endless supply of hot water while heating only the demand that is needed. This performance cuts water heating costs up to 50%.

Low Emissions. Because of the high efficiency of our tankless heaters, the NOx emissions are minimized. In addition, because the water heaters only heat water on demand (less "on-time") they emit less CO than other water heaters.

Compatible Products

The **KEW Poseidon 7-67** premium class industrial hot (*up to 185°F*) & cold water pressure washer combines the renowned lifetime quality of the "C3" pump, with state-of-the-art ergonomics to bring you an unbeatable heavy-duty pressure washer solution to fill the needs of a variety of industrial applications. The high water flow makes it very useful for applications where a high level of dirt has to be removed or flushed away quickly and easily.

AaquaBlaster LT is designed to clean the interior of wine barrels, tanks & and takes cleaning to a whole new level. The shape of the head as well as it's stand have been designed to make insertion as easy as possible. The four nozzle configuration sweeps every surface.

AaquaTools ToteBlaster LT IBC/Tote Cleaning System is designed to wash and rinse the interiors of totes and intermediate bulk containers (IBC). Perform in-house IBC cleaning in less than half the time.

AaquaSteam Portable Electric Steam Generator is a vital step in eliminating the bottling line of unwanted organisms & bacteria. Steam sterilization is effective and environmentally-friendly since it reduces energy and water usage and can reach a higher temperature than water, 212 degrees vs. water 180, and delivers heat rapidly through condensation.

Accessories

Trigger Gun

Super Short Lance

Bayonet Fitting

Quick-Connect Coupler
