High Impingement Utility Bin Cleaner

Tilt Truck and Poly Box Washer

The **AaquaTools Tilt Truck Washer** is the perfect device to take on the nearly impossible task of cleaning Rubbermaid and Uline Tilt Trucks and Poly Boxes quickly and efficiently.

The Tilt Truck Washer utilizes the same cleaning technology used in some of our other successful AaquaTools devices. We incorporate two high impingement cleaning nozzles attached to a platform that rotate around a turret to provide complete orbital cleaning coverage of the interior surface of the cart.

Carts are rolled onto forks located on the device that lift the containers into cleaning position. Once in position, a high pressure washer delivers water at 1500 psi with low flow (minimum 8 gpm) to the cleaning heads which in turn deliver a precise 360 degree rotation of cleaning spray. Depending on the material to be cleaned and the temperature of the water, a cleaning cycle can be completed in as little as 30 seconds to 3 minutes. When the cycle is complete, the cart is lowered and rolled off the forks. Simple and effective operation.

- Simple Design
- Easy to use
- Very sturdy construction
- Easy set-up, all hydraulics and controls are included and already assembled.

Specifications

Power (H.P.)	2x2.5
Dimensions*(L x H x W)	61"x78"x50"
Weight empty (lb)	380
2-phase voltage (v)	220/440
Material	AISI 304 Stainless Steel
Minimum cleaning time	30 seconds
Max. water temp. (F°)	180° - 185°
Impact Pressure (psi)	1500
Required flow rate (gpm)	8

Proper sanitation protocols are critical in hospital applications. In these cases, the use of hot water (180°-185°) may be preferred. In a heavily soiled trash cart, higher flow (gpm) and 160°F might be desirable to accelerate the cleaning process.

With over 15 years of container cleaning experience and hundreds of installations, AaquaTools has the experience to solve the most difficult of cleaning tasks. The Tilt Truck Washer can work with minimal modifications on any Tilt Truck or Poly Box making a valuable tool in your sanitation process.

...and Poly Boxes.

Special Features

The efficiency device's rotating turrets is achieved thanks to four stream jets that work at a low flow rate, but high pressure, thus providing high impact washing. Stream nozzles rotate around the turret mechanisms to provide complete orbital cleaning coverage to all interior surfaces.

Oversized case & gears made from a revolutionary self-lubricating hard plastic provide a significant advantage over the competition. They provide smoother motion, can withstand greater pressure, and are more durable than brass.

Compatible Products

The **SC DUO 7P** significantly improves the performance of our barrel washers. Thanks to higher working pressure and increased water flow, even large heavy-duty cleaning jobs can be handled with ease.

Cleaning efficiency is maximized by using a 4-piston long-life motor pump accepting both cold and hot water up to 85°C. Designed for large cleaning tasks, the SC DUO 7P is ideal for barrel cleaning and other general maintenance and cleaning. Built for use in excess of 6 hours per day, the DUO 7P will meet your exact cleaning needs and ensure a lower Total Cost of Ownership.

The **Mi-T-M** Portable Pressure Washer is just the workhorse you need to power our Tilt Truck Washer. The belt driven triplex piston pump is a powerhouse that delivers 12 gpm at 1500 psi and

can accommodate hot water up to 185°, an ideal match for fast and effective cleaning. This pressure washer is built tough with a powder coated steel frame and base plate, 13-inch flat-free tires, and enclosed belt guard. The unit is driven by a totally enclosed fan-cooled electric motor with thermal overload protection, a heavy-duty dual cogged belt drive system, and comes with a 10-foot power cord, and 50-foot x 3/8-inch non-marking high pressure hose.
